

Resource 12 Stakeholder Analysis

Use this blank Stakeholder Analysis Template to synthesise all of the important information about your stakeholders into a final framework that connects different stakeholders with your project.

In addition to the information you have already collected in your stakeholder category framework (**Resource 10**) and stakeholder influence/interest analysis (**Resource 11**), you will need to identify:

- Potential risks associated with the relationship your organisation will have with each stakeholder
- Strategies to guide your organisation’s relationship with each stakeholder
- Which team members will be responsible for looking after each stakeholder

Your Stakeholder	What is their interest in the project?	What level of impact do they have upon success?	What can they contribute to the project’s success?	What potential threats do they pose to success?	What strategy will you use to build a relationship with stakeholder?	Who is responsible for this relationship?

Resource 12 Stakeholder Analysis

Your Stakeholder	What is their interest in the project?	What level of impact do they have upon success?	What can they contribute to the projects success?	What potential threats do they pose to success?	What is the strategy to build a relationship with stakeholder?	Who is responsible for this relationship?
